

PROJECT SNAPSHOT

Client: Whiston Hospital, Manchester
Completion Date: August 2009

Whiston Hospital

One of our more challenging projects, this 4th floor roof top terrace at Whiston hospital was completed for Taylor Woodrow in August 2009.

The substructures were prepared by Ashlea Construction who co-ordinated the whole project and arranged logistics in moving 10 tonnes of plant and materials into the working area.

All materials had to be transported through the building with minimum disruption and higher than normal safety considerations.

In total 115m² of wetpour were laid to create a vibrant courtyard with planters for staff, patients and visitors to enjoy.
